

METHODISTS VISIT GETTYSBURG FIELD

Committees Only Hold
Meetings Today in
Baltimore.

BALTIMORE, May 9.—The fourth day of the general conference of the Methodist Church at the Lyric Theater, was opened today with devotional exercises conducted by the Rev. William W. Van Gorder, of the First Methodist Church, Baltimore. The Rev. Dr. Van Gorder was assisted by the Rev. John W. Bennett, of the Montana conference, and the Rev. B. F. Brooks, of the Puget Sound conference. Bishop David H. Moore presided at today's session.

Today will not be given wholly to business. This afternoon, a majority of the delegates and visiting Methodists will go to Gettysburg. Several special trains will be required to take the vast number and their friends to the historical battlefield.

The standing committees, which will remain in the city including those on book concerns, education, freemen, and Sunday schools, home missions, and church extensions, foreign missions, and temperance and prohibition, will hold sessions in various Baltimore churches.

One of the most interesting features of the conference will be the election of eight heads of the Methodist Church. Balloting probably will begin about May 20. Among those most prominently mentioned for elevation are the Rev. William F. Anderson, corresponding secretary of the education board; the Rev. William A. Quayle, of St. James' Church, Chicago; the Rev. F. D. B. Downey, assistant secretary of the board of Sunday school literature, New York; and the Rev. John F. Goucher, former president of the Woman's College, Baltimore.

BILL CHANGES MIND ABOUT THE WORKHOUSE

"Bill Jones the Avenger" has changed his mind. He does not want to go to the workhouse, although he thought he did.

"Bill Jones" is a real avenger. It was he who shot at and attempted to kill Gutierrez while the assassin was being taken to the police court. He was one of many Washingtonians who watched the daring deed that "Bill Jones," a reckless, dare-devil sort of a fellow, mounted his charger after Gutierrez had been placed in the Police Court van, and, riding to the side of the vehicle, drew a horse pistol and began firing at the head of the assassin. The bullets failed of their mark, and the revolver was wrested from "Bill" with difficulty.

Of late "Bill Jones" has wandered far and often from the soft glow of the hearthstone, and traversed devious paths. True, he has spent some months in the workhouse, but he is still "Bill Jones the Avenger," and looks it. "Bill" is a short, thick-set fellow, with a firm jaw, eagle eye, and has determination written all over his countenance.

Last night, weary of limb and restless of spirit, "Bill" approached Policemen Brennan and asked to be chaperoned to the Sixth precinct, thence to the workhouse, via the Police Court. He was accommodated, and a charge of vagrancy recorded against him.

This morning "Bill" was not so keen for the workhouse. He preferred to enjoy his liberty and float about untrammelled. Prosecutor Pugh dropped the charge against "Bill," and the avenger left the prison pen.

MRS. GOULD'S FATHER DIES IN INSANE ASYLUM

JACKSONVILLE, Ill., May 9.—Seldon P. Clemmons died here yesterday at Central Insane Hospital. He was seventy years of age and was blind. He was the father of Kathryn Clemmons Gould, wife of Howard Gould, and was brought to the hospital May 6 from his home in Milton, Ill. His death was due indirectly to a stroke of paralysis suffered a few years ago.

Mr. Clemmons' first wife was a daughter of Col. Thomas M. Kirkpatrick, whose home was in Winchester, Ohio. They had two children, Ella and Kathryn Clemmons. Clemmons obtained a divorce and the mother and two girls left for California after the elder, Ella, had married and left Charles Watts, of Milton. On the coast the elder girl took up alum work and recently married a Chinaman.

Kathryn, the younger girl, went on the stage, and several years later married Howard Gould.

DYING WOMAN PUTS ON HAT WHILE AMBULANCE WAITS

BATTLE CREEK, Mich., May 9.—Brooding over her brother's suicide, Miss Helen Carter took chloroform this morning to end her life. Later she changed her mind, called the police by telephone and explained what she had done. An ambulance hustled her to the hospital, where doctors pumped out the chloroform in time to save her life.

Police say Miss Carter, before going to the hospital, delayed the ambulance until she could put on her hat with two yards of veil.

SICK HEADACHE

Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Headache, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER.

James J. Hill and Carnegie Will Address the Governors

Men Noted in Many Lines of Endeavor Invited to
Speak at White House Conference—Mitchell
to Lead Discussion Upon Mining.

Announcement was made at the White House this morning that the list of speakers who will address the governors' conference next week has been finally decided upon. The list as arranged includes the names of some of the most noted celebrities in their respective lines of endeavor.

Prominent on the list are the names of James J. Hill, who will speak on "Transportation," Andrew Carnegie, who will speak on "Ores and Relative Minerals," and John Mitchell, former president of the United Mine Workers, who will lead a discussion on coal mining.

For the discussion of each topic was selected the most eminent expert known to the advisers of the President, and the man who could give to the conference the most authoritative information. The selections were made without considering experts in the service of the Federal Government, as it was considered that all information should come from outside and independent sources.

All of the following together with those mentioned, have consented to take part: Prof. Emory R. Johnson, Philadelphia, "Navigation." H. S. Putnam, New York, "Power." Prof. T. C. Chamberlain, Chicago, "Soil." R. Long, Kansas City, "Forests." Dr. George M. Kober, Washington, "Sanitation." George C. Pardee, Oakland, Cal., "Reclamation." Judge Joseph M. Carey, Cheyenne, Wyo., "Land Laws." H. A. Jastro, Bakersfield, Cal., "Grazing and Stock Raising." Dr. I. C. White, Morgantown, W. Va., "Mineral Fuels."

Authority on Water Carriers.

Prof. Johnson is recognized as an eminent authority on navigation. He is the professor of transportation and commerce in the University of Pennsylvania, and has written several books on water transportation. He was at one time a member of the Isthmian Canal Commission.

Mr. Putnam is a civil engineer of New York, who has devoted much of his energy and ability to the electrification of railroads. In collaboration with his partner, Mr. Stillwell, he wrote a work on the substitution of electric motors for the 4,000 steam locomotives in use in the United States. This was published in 1907, and is regarded as the most comprehensive work on this subject. Mr. Putnam is also an expert on the construction of electric railways.

Prof. Chamberlain is the senior professor of geology in the University of Chicago. He was at one time connected with the Federal Geological Survey. Then he became president of the Uni-

POSSE QUITS SEARCH FOR CHILD'S ASSAILANT

LANGLEY, S. C., May 9.—There is much talk today of the assailant of the little Leopold child, who was attacked yesterday afternoon beyond her meager description which does not fit anyone known in this vicinity. Armed men scoured the woods last night, but became discouraged this morning. Only one arrest has been made, and the man is held on suspicion, though prominent residents of the place say the grounds for suspicion against him are slight.

The authorities will not give the name of the suspect. The situation is this: If the right man is found he will be summarily dealt with, for the people are wrought up to a high pitch. But until there is reasonable ground for belief that the right man has been found, there will be no attempt at lynching. The child is said to be somewhat better this morning, though still in a critical condition.

BALTIMORE CENTENARIAN CELEBRATES ANNIVERSARY

BALTIMORE, May 9.—Mrs. Ann Boudier has celebrated her eightieth birthday here today. She was born in Baltimore, 1824, North Payson street, where she lives. A number of Mrs. Boudier's friends called to extend congratulations and to express the wish that she might see a few more decades come and go.

She was in fine spirits, and replied cheerily to all the greetings. While a full year ago disabled her, Mrs. Boudier's mind is still "clear as a bell," as she says, and she loves to chat of the days gone by.

She was born in England, but came to this country in 1840, and to Baltimore when a girl. She remembers well the time when Lafayette walked down Charles street. Then tea rooms and chocolate emporiums were an unknown quantity on this thoroughfare.

Mrs. Boudier remembers the last battles of the Napoleonic wars. The newspaper accounts of the Battle of Waterloo made a deep impression on the girl's mind, and she recalls the comments made by her friends then on the overthrow of the Man of Destiny.

versity of Wisconsin and State geologist of Wisconsin. He is now president of the American Association for the Advancement of Science. He is probably the foremost advocate of the coalfield, now commonly accepted by the scientists, that properly cultivated soil gains in richness as the years go by.

Leader in Lumber Trade. R. A. Long, of Kansas City, who will speak on the forests, is a prominent lumberman, and will discuss his subject from the lumberman's standpoint. He is now cutting Southern pine, and his firm has retail yards in many parts of the Central West. Mr. Long has written papers on the timber question, in which he takes a broad view of the necessity of conservation.

Dr. George M. Kober has been called the most useful citizen of the District of Columbia. He is dean of the faculty of Georgetown University, and was one of the leading promoters of the Sanitary League. This organization has constructed healthful dwellings in Washington, and is renting them to the poor at rates lower than the cost of the houses. As a member of the commission on water supply and improvement for the District, Dr. Kober took a leading part in the investigations and agitation which led to the construction of the Washington filtration plant. He has gone deeply into the relation of the water supply to the health of the city, and has prepared data for the conference to show how it pays in cold cash to have pure water.

George C. Pardee was governor of California at a period when a great many questions relating to natural resources and the hydraulic mining law were being discussed. In his official capacity he was obliged to deal with the friction which developed between farmers and other citizens on the one hand, and the hydraulic miners on the other. Hydraulic mining had been the means of dilling the beds of streams and causing floods. In his administration, too, the drainage of thousands of acres of land along the Sacramento river was a burning issue. Dr. Pardee was a burning issue. Dr. Pardee was a burning issue. Dr. Pardee was a burning issue.

Land Laws Called for Carey.

Judge Carey is known in connection with the land laws for the legislation which bears his name. This was enacted when Judge Carey was a member of the United States Senate, and restricted holdings to 160 acres.

H. A. Jastro is president of the American National Live Stock Association, and is recognized by stock men as a leading authority on grazing and stock raising. He has been actively identified with the development of the West and is one of the West's foremost citizens.

Dr. I. C. White is State geologist of West Virginia and professor of geology in the University of West Virginia. He is recognized as the leading authority on petroleum and natural gas. He was also chosen as a member of the Brazilian coal commission, the Brazilian government having sought the assistance of the Government of this country in securing the best American authority on mineral fuels.

WILL SPEND HONEYMOON IN BRIARCLIFF WINNER

GREENWICH, Conn., May 9.—That Cupid was the real author of the winning Iowa automobile in the Briarcliff Manor races two weeks ago was made manifest when its millionaire owner, John H. Tyson, Jr., took out a license to wed Miss Grace Ethel Starr, with the announcement that the victorious car was to be the honeymoon home of the couple.

Young Tyson just turned twenty-two, is the son of the late George L. Tyson, commodore of the Riverside Yacht Club. He is well known in New York. His fiancée is the daughter of present Commodore Alfred B. Starr of the club. She is twenty, and was considered the prettiest debutante of the Greenwich season last year.

The wedding will take place on May 23, at the Tyson homestead in Riverside. Only the immediate relatives and a few intimate friends will be present. The couple will make a bridal tour of the United States in the Briarcliff winner. Two other cars will accompany them.

UNION CLUB ENTERTAINS.

The National Union Club of this city held its second annual entertainment and ball at National Rifles Armory last night. A varied program was offered.

CHILDREN STRIKE AT TEACHERS' RIDE

Offenders Patronized Chester Trolley Car During Boycott.

CHESTER, Pa., May 9.—Because two teachers had ridden on a trolley car while the strike is on, 200 pupils refused to attend school yesterday, and the Board of Education heard the grievance of angry parents last night.

Finally, after the young women had apologized for such a serious offense, the board decided that there was nothing to forgive.

This statement from the teachers was received. "We regret having incurred the displeasure of the parents of many pupils by having ridden on a trolley car. The teachers are working people themselves, and we did not suppose that in riding home in the worst storm in two years we would be criticised."

Three hundred pupils of the Morton Avenue public school assembled at the building and refused to enter unless two of the teachers, Miss Annie Anderson and Miss Anna J. McFarland, were removed, because they had ridden on a trolley car of the Chester Traction Company.

When Miss Anderson and Miss McFarland arrived at the school they were greeted with cries of "Scab!" and "Strike-breaker!" The young women, fearing a physical encounter, hurried into the building.

"Come on, fellows, let's go see Mr. Cole," said a youngster of twelve. Following his lead, the boys and girls marched to the office of Superintendent Thomas S. Cole, five blocks away, and demanded an audience.

"What's the matter, boys?" Mr. Cole asked, and immediately there was a chorus of responses: "We're on strike; we won't go to teachers who ride on scab trolley cars." It is understood that the parents of a number of the pupils are encouraging them in their stand. The teachers in question may be transferred to schools in other sections of the city.

THRASH DANCING GIRLS, IS ALDERMAN'S ADVICE

WILKESBARRE, Pa., May 9.—"Girls who go to balls and remain out all night should be horsewhipped," said Alderman Donohue in his court, recently.

George Banco, a church organist, who has been sent by his pastor to a dancing house in the town of Ashley to get girls to return to their homes Sunday morning, was arraigned, charged with breaking up the ball.

Alderman Donohue said he did right, but did not go far enough. The justice declared that the man should have taken a horsewhip along with him and thrashed the females.

CHIEF JEWELRY SEIZER WILL QUIT TREASURY

"Chief Seizer" W. W. Theobald is going to quit the game. It is understood that this man, who has seized more valuable jewelry than all the other special agents of the Treasury Department put together, will resign within the near future, and take up another line of work. Theobald caused a sensation in 1901 by seizing diamonds valued at \$25,000 belonging to C. Lejeune.

Later he seized a necklace worth \$5,000, owned by Mrs. Harrison Dulles. This was returned because in his over-zealousness Theobald seized on a ship-board. One of Theobald's most celebrated cases was the seizure of \$6,000 worth of jewels belonging to Mrs. Phyllis E. Dodge.

He became connected with the Treasury Department in September, 1897, and has a most enviable record.

Anty Drudge Tells How to Avoid Accidents.

Anty Drudge—"Goodness gracious! Have you and Jimmy been in a train wreck?"

Mrs. Womble—"Worse than that—washboiler upset when I was stirring the clothes; and I had to hire Mrs. O'Sullivan to do the washing after all."

Anty Drudge—"Well, the damage is done. But perhaps now you'll take my advice and do your washing with Fels-Naptha in cool or lukewarm water. It'll save you lots of work, save your clothes and prevent accidents like this."

So easy, says every woman, after her first trial of the Fels-Naptha way of washing.

And so quick, and such a clean, sweet smelling batch of clothes!

And that, too, without boiling or scalding hot water!

And no back-breaking work on the wash-board!

And yet, perhaps, that same delighted woman had been going to try Fels-Naptha almost every washday for years before she actually did. For some reason or other (which is no reason at all) she kept on working the old-fashioned, out-of-date way until a sudden impulse determined her to try Fels-Naptha. And then ever afterwards—so easy washdays.

Be sure and use Fels-Naptha the Fels-Naptha way. Follow directions on the red and green wrapper.

PANIC IN NIGHT ON MAURETANIA

Snapping of Propeller Blades Reduces Big Cunard-er's Speed.

NEW YORK, May 9.—The giant Cunard turbine steamer Mauretania, which reached her dock today after having been delayed twenty-four hours outside of Sandy Hook by the fog, smashed two blades of her forward port propeller at midnight Sunday, and the accident so jarred the ship that the passengers left their berths in a panic, thinking a collision had occurred.

The Mauretania was humming through the water at the rate of twenty-six knots an hour at the time she snapped her propeller blades. There was a wrench of the propeller shaft, and the steamer trembled from stem to stern. Captain Fritchard and the other officers of the ship, quickly learning what had happened, reassured the passengers. The latter were told that one of the ship's four propellers must have struck something, but that there had been no collision.

The accident prevented the Mauretania from reaching the 344-knot-an-hour average for a round trip, which she was trying to make to fulfill the requirements of the British mail subsidy. She was compelled to finish the rest of the trip with only three propellers.

The ship has been making 172 revolutions to the minute. Even with only three propellers she averaged 22.50 knots an hour to Sandy Hook light, the whole time of her passage being five days, six hours, and seventeen minutes, exclusive of the delay outside the Hook by the fog.
